

ACKNOWLEDGEMENT

*I extend my gratitude to the World Health Organization both SEARO and the Country Office in India for their continued technical and financial support to carry out the intensified leprosy activities in the high endemic districts of **Janjgir-Champa** and **Raigarh** in Chhattisgarh.*

The technical guidance of Dr. Sumana Barua, Dr. Sampath Krishnan and Mr. D. Kamaraj of World Health Organization were very helpful in executing the activity.

We are thankful to Dr. C.M. Agrawal, Deputy Director General (Leprosy) of the Central Leprosy Division, Directorate General of Health Services, New Delhi for his administrative cooperation.

I am also thankful to Dr. Harish Rathod, Ex-Director, Regional Leprosy Training and Research Institute (RLTRI), Raipur, Dr. Krishnamurti Kamble, Joint Director (Orthopedics), RLTRI, Raipur, Dr. Sunil Vilasrao Gitte, Deputy Director (Epidemiology) and S. Saha, RLTRI for their valuable contribution in preparation of training manuals, modules specifically for the above mentioned activity.

I am also thankful to the Director of Health Services, Chhattisgarh for his administrative cooperation and Dr. D.P. Bhatpahare, State Leprosy Officer, Chhattisgarh for his active support in execution of field activities.

I also acknowledge the contribution of State Health Resource Centre, Raipur for providing their technical guidance during training, especially to Dr. S.L. Gupta, NLEP Consultant for sharing his vast experience.

The undersigned extends his sincere thanks to the Chief Medical and Health Officer and District Leprosy Officers of Raigarh and Janjgir-Champa districts for their active cooperation for conducting training activities at the Block level.

It would be true to say that without the helping hand and involvement of Block Medical Officers of eight selected blocks, it is almost impossible to plan and execute training program within the span of two and half months.

I also acknowledge the contribution of Local Print Media, officials of Railways, different State Government Departments, Red cross society, NGOs, political leaders and persons affected with leprosy for sharing common platform and for their valuable suggestions towards reduction of disease burden by intensifying IEC activities in different ways and means.

I am also thankful to the staffs of RLTRI, Raipur for their tireless effort to complete the project successfully.

I hope the above activity with the technical and financial support of World Health Organization will be of great help in reducing the burden of leprosy cases in the project area.

**Dr. R.N. Sabat,
Director,
RLTRI, Raipur,
Chhattisgarh, India**
